

Integrate Brightpearl with Loop

Keep your systems up-to-date easily

We've integrated with Brightpearl so Loop can perfectly fit into your existing systems. Loop will automatically create sales credits in Brightpearl tied to the original order, keeping your operations smooth.

Returns in Loop will then be processed based on updates to the sales credit in Brightpearl. Both platforms remain accurate for you without a strong manual lift.

Level up with key benefits

1. Seamless integration into your systems
2. Automatic sales credit creation and processing
3. Delightful returns, refunds, and exchanges

About Brightpearl

Brightpearl provides a retail operating system (ROS) for retailers and wholesalers. Its mission is clear: automate the back office so merchants can spend their time and money growing the business. Brightpearl's ROS includes financial management, inventory and sales order management, purchasing and supplier management, CRM, fulfillment, warehouse and logistics.

Brightpearl will help you save time, make data-driven decisions and achieve your goals.

Learn more about how we can help you create a delightful returns experience.
